PROFILE SUMMARY

Java Full Stack Developer with strong front-end development skills and practical experience building responsive, scalable web applications using HTML5, CSS3, JavaScript (ES6+), and React.js. Proficient in Core Java, JDBC, Servlets, JSP, and MySQL for server-side development. Familiar with MVC architecture, RESTful APIs, Spring Boot (learning), and Agile methodologies. Skilled at integrating front-end interfaces with back-end services, applying responsive design principles, and debugging across multiple browsers. Demonstrated ability to work in team environments and deliver maintainable, user-centric applications.

SKILLS

Front-End Development: HTML5, CSS3, JavaScript (ES6+), React.js, DOM manipulation

React Ecosystem: React Hooks, React Routers, JSX, Component-Based Architecture, State Management, Redux

Design Principles: Responsive Design, Flexbox, CSS Grid, Media Queries, Basic UI/UX Principles

Tools & Technologies: Jest, Visual Studio Code, Chrome DevTools, NPM, AWS(EC2), Git & Git-Hub, Jira, Postman

Back-End: SQL, Java, JDBC, Servlets, JSP, MVC Architecture, RESTfull APIs, Hibernate(ORM), Spring-Boot

Other Skills: Agile/Scrum, DSA, Debugging, Problem Solving, Excellent Communication

PROJECTS

Job Portal – Full Stack Web Application, [Link](#)

- Developed a full-stack Job Portal using React.js, Java Spring Boot, and MySql, enabling recruiters to post jobs and candidates to apply seamlessly.
- Built and integrated RESTful APIs for job listings, applications, and profile management.
- Implemented role-based authentication and authorization with JWT for secure access control.

Food Delivery Web Application, [Link](#)

- Responsive Design using Tailwind CSS for seamless experience on desktop, tablet, and mobile.
- Component-Based Architecture using React hooks and state management for clean code and reusability.
- Created dynamic shopping cart functionality with add/remove items, quantity updates, and live price totals.
- Implemented category-based product filtering and intuitive navigation for enhanced user experience.

RedStore – Responsive E-Commerce Website, [Link](#)

- Built a fully functional shopping cart allowing users to add/remove items, adjust quantities, view subtotals, and dynamically reflected cart state across the navigation bar.
 - Optimized for cross-browser compatibility and mobile-first design, ensuring smooth performance on all devices.
 - Utilized Git for version control, with clear commit history demonstrating feature development, bug fixing.
-

EDUCATION

Field marshal K M Cariappa college, Kodagu, Karnataka, Bachelor in Computer Application, 2021 - 2024

Aruna Pre University College, Kodagu, Karnataka, Commerce in GEBA, 2019 - 2021

CERTIFICATIONS

Java Full-Stack Development, Besant Technologies

AI Tools & ChatGpt Workshop, BE10X
